

Aspen Round Top Summit Gully

Load Class up to FACTA C250

Aspen Stainless hardworking stainless steel products for hard wearing environments: British engineered with a lifetime guarantee.

Product Description

The Summit Gully is a general purpose Spot Gully designed for a wide array of applications. Available in either 110mm & 160mm outlets, the Summit gully is fully drainable & cleanable, and all internal components are removable for rodding access.

Suitable for hygienic & demanding environments with a medium-load factory traffic.

Technical Specification

- Developed in accordance with hygienic design principles BS EN 1672, BS EN ISO 14159 & EHEDG documents no. 8, 13 & 44.
- Fully drainable design, incorporating internally radiused joints.
- FAT: Foul air trap (maintains 50mm water trap)
- Cleanable design (FAT & trash basket removable).
- Available with solid or ladder style covers.
- Optional back-inlet available.
- Stainless steel grade 316.

- Condense/Back-inlet (with or without Tundish)
- Locking covers
- Gully lifting tool
- Trash basket perforation size variable

Cleaning

Many factors affect the choice of cleaning method and frequency of its application. Suitable methods for stainless steel are: water and steam; mechanical non abrasive scrubbing; organic solvents and mild detergents.

Maintenance

Stainless steel equipment should be occasionally thoroughly checked for retained deposits and concentrated fluid build up that causes corrosion.

Aspen Drainage Installation

ASPEN Stainless offer supply only or full installation, with fully welded and polished joints, and commissioning. ASPEN Stainless also offer on-going annual inspection and maintenance contracts.
